Country : The Netherlands
Period : 2006 / 2007
Category : Conceptual design
Engineering and detailed design
Procurement and construction
Testing and commissioning
Overall Project Management

PROJECT DESCRIPTION

OACG, later on taken over by Hertel, was awarded an EPC contract from Allseas related to detailed design and fabrication of the 240 persons accommodation block, for the new-built DP3 pipelay vessel AUDACIA. Hertel awarded a management contract to The Offshore Partners to execute the contract. The Offshore Partners provided management and staff to perform the detailed design, subsequent 2,000t steelworks (Dordrecht PD) and management of the electrical (Alewijnse) and HVAC (Heijnen & Hopman) installation, piping and outfitting of galleys, cabins, offices and complete nautical bridge (Hertel). Initially, the accommodation was to be built as one block, but due to lifting restrictions, Allseas gave instructions to split the block into various sections and perform final hook-up of the sections at Keppel Verolme yard in Rotterdam.
