

Client / Operator : Fugro Marine Services
 Project name : Lightweight drillship FUGRO SYNERGY
 Construction yard : Scheldepoort, Flushing
 Country : The Netherlands
 Period : March - April 2010
 Category : Engineering, consultancy and supervision

PROJECT DESCRIPTION

In March 2010 Fugro Marine Services requested The Offshore Partners to provide engineering, consultancy and supervision assistance, for the mobilization of the brand new lightweight drillship Fugro Synergy. The vessel was demobilized and mobilized, within two weeks after a few weeks of preparing all necessary job activities. The mobilization included the installation of several new operational systems, extended accommodation and the installation of a foundation for a two storey laboratory and several foundations for containers and working platforms.
